GENERAL INFORMATION

Experienced Full-Stack Engineer & Information Security Engineer with over 4 years of expertise in enterprise-level development. I have successfully contributed to more than **10 projects across Web, Mobile, and Security domains**, including international initiatives. I am committed to continuously enhancing my skills and leveraging optimal, efficient solutions for every task. Proficient in **TypeScript, Node.js, React, and Next.js** for the past four years, I possess extensive experience in building performant and reliable backend and frontend applications.

WORK EXPERIENCE

Invygo FZ-LLC, Remote — *Software Engineer & Application Security Engineer*
September 2023- Present
Contributing in building the most powerful renting car system

- Conducting **penetration testing** for all company digital assets, including APIs, web applications, and mobile applications.
- Successfully resolved and fixed over **60 vulnerabilities** that I reported.
- Conducting regular **code reviews** to identify hidden vulnerabilities.
- Integrating security tools into **the codebase and CI/CD pipeline**, such as **Snyk, SonarQube, and Trivy**.
- Contributed to the **API design** and implementation to ensure compliance with security and performance checklists.
- Overseeing the company's processes and operations to ensure compliance with **PCI standards**.
- Contributed in shaping up ideas that made it into final release like gas savings which encourage end

Self Employed, Remote — *Owner*
February 2022- Present

In 2022, I launched my online business in the cybersecurity industry, assisting a diverse range of companies—ranging from small startups to large organizations—in securing their digital assets. Notable collaborations include working with Dubai-based firms such as **JustLife (6$M)**, as well as Moroccan startups like **Shipsen (4$M)** and **Chari (3$M)**.

Fikralabs, On-Site — *Full Stack engineer*
February 2021- 2023
Contributed to the development of multiple projects at FikraLabs Agency

- Contributing to the development of frontend applications using **Typescript**, **React and Next.js**.
- Contributing to the development of backend applications using Node and Nestjs.

- Contributed in the API design, specs, DX and UX
- Configured unit, integration and E2E tests, linting, formatting, pre-commit, CI/CD with Vercel and GitHub action
- Deliver comprehensive security services to our clients.
- Leading a team of engineers to deliver client projects effectively.
- Leading a **Full-Stack Bootcamp at the company**, where I conduct multiple workshops for our students
- Participating in client negotiations to identify the best IT solutions tailored to their needs.
- Wrote documentation about each frontend codebase, code review process etc...

Bug Bounty Hunter , Remote — *Hackerone*
March 2020 - 2023

In my free time, I participate in bug bounty programs, including those for **LinkedIn, Toyota, and Deliveroo**, where I report security issues and collaborate with their teams to resolve them. **I achieved a rank of 4th in the Deliveroo public program**, which involved thousands of participating hackers
